### Identify Rating Type

- **Rating of Record (Annual)**
  
  This is the performance rating prepared at the end of the rating period for performance on all the elements in the performance plan over the entire period and the assignment of a summary rating. The rating period is normally 12 months.

- **Summary Rating (Interim)**

  A performance rating may include the assignment of a summary rating of all the elements when an employee has served a minimum of 6 days on a plan. A performance summary rating is used for interim appraisals (issued during the performance cycle) and should be considered when issuing an annual rating of record.

- **Off-Cycle Rating of Record**

  This is a rating of record that is only prepared to document less than fully successful performance or an acceptable level of competence, determination for performance of agency-assigned duties during the rating period with the assignment of a summary rating. This type of summary rating is required to support personnel actions associated with within-grade increases. Additionally, it should be considered when issuing an annual rating of record.

- **Unratable (less than 120 Days)**

  The appraisal of performance compared to the performance standard(s) for the critical element(s) which has been an opportunity to perform for the minimum period.
